Abstract

KEYWORDS:

JEL classification codes: C12, C14.

*

1 Introduction

2 Admissibility in the Normal Model

2.1 The Experiment

2.2 What the Number of Core Moments Changes

2.3 Two Moments

2.4 Three Moments

3 From Population Inequalities to the Normal Experiment

4 Local Power

4.1 Two Cores and One Redundant Inequality

4.2 One Core

5 Concluding Remarks

Appendix A Proofs for Section 2

Appendix B Local Limits
